**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY****International application No.
PCT/KR 2004/002730****Continuation No. I****Basis of the opinion**

1. With regard to the **language**, this opinion has been established on the basis of the international application in the language in which it was filed.

Continuation No. V**Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement****1. Statement**

Novelty (N)	Claims 1-23	YES
	Claims ----	NO
Inventive step (IS)	Claims 1-23	YES
	Claims ----	NO
Industrial applicability (IA)	Claims 1-23	YES
	Claims ---	NO

2. Citations and explanations:

The documents cited in the search report merely refer to the state of the art in the field of frame synchronisation in OFDM based wireless communication systems.

None of said documents discloses a method for constructing an efficient preamble structure in which the preamble is constructed such, that the same pattern is repeated in the time-domain by the number of times decided based on a frame structure, to thereby design the frame structure unrestrictedly and minimize waste of time and frequency resources.

Thus the subject matter of independent claims 1 and 15 meets the requirements of novelty and inventive step.

The subject matter of the dependent claims can be considered novel and inventive by virtue of dependency.

Industrial applicability is obviously given.
